

ABSTRACT OF THE DISCLOSURE

A method for establishing a peer to peer match of clients for at least one application, the method including: receiving at least one offer being indicative of at least one application for which an offer for matching is proposed from an offering peer client, and recording at least one attribute associated with the offer using at least one offer record; receiving a measurement of at least one communication link property between the offering peer client and an inquiring client; and comparing the offer record with the measured at least one link property to determine if a peer to peer match between the offering and the inquiring peer clients is to be permitted.
